

Using Widgets

You can embed widgets of any actions on your own web sites. This way you can share actions with your own branding. AND, if you embed actions through your own Action Network account, you will be able to keep the data of everyone who takes part in that action.

To embed a widget, use the code on the "Thank You" page. Just login in to your own web site and embed the code in the same way you would with a YouTube Video.

Here's a screenshot of a "Thank You" page with the widget circled.

Advantages of using Action Network widgets

- **Keep your own data** – Everyone who takes action will become part of your Action Network list
- **Use your own organizational branding** – Embed widgets on your own site instead of linking to another site
- **Share actions** – Actions are all easily shareable on social media sites
