

To the CEO of Thai Airways Mr Chai Eamsiri and COO Mr Chawan Rattanawaraha

CC: Thai Airways staff and executive

We will not book any flights with Thai Airways until the airline makes a public commitment to cease all weapons shipments to Israel. We are informing all our friends and networks that Thai Airways is currently shipping F35 parts from Sydney to Bangkok bound for the Nevatim Airbase in Israel. We expect a widespread consumer boycott of Thai Airways will occur based on your airline's complicity in war crimes.

Thai Airways is directly facilitating the shipment of F35 weapons components to a state that is committing genocide. Your airline's image will be forever scarred by this complicity.

Transferring weapons to an ongoing genocide is in breach of at least three sets of laws: the Australian Defence Export Regulations 2013, the UN Arms Trade Treaty 2013 and the Genocide Convention of 1948. In any future prosecutions of the Israeli genocide, Thai Airways can be charged for these violations.

We are aware that at least 71 F35 weapons shipments have been carried on Thai Airways passenger flights since Israel began bombarding Gaza with F35 jets in 2023. Secretly transporting lethal weapons components in the cargo hold of your passenger planes is illegal under the above mentioned laws, and is a terrible betrayal of your passengers.

Thai Airways portrays itself as a gentle and kind airline. Your publicity material connects your airline with relaxing holidays in beautiful Thailand. Consumers will be horrified to learn that you are secretly supporting an ongoing genocide in Palestine.

We ask that you immediately and publicly affirm that Thai Airways respects the international treaties and laws against genocide, and that you will absolutely never ship weapons again.

We await your response.
