

**Support the Fairfax to Zero  
Initiative!**

Dear Fairfax County Board of Supervisors,

Fairfax to Zero is an ambitious effort to promote local policies that will reduce greenhouse gases by 2% every year, reaching carbon neutrality by 2050.

Fairfax County will take bold, urgent and sustained actions to become a leader in local solutions to climate change. Specifically, Fairfax to Zero advocates to:

- Craft a comprehensive county-wide Climate Action Plan to implement the county's new 10 year Environmental Vision, including annual and capital budget allocations and performance metrics
- Publicly account for progress meeting the Supervisors' commitment to reduce greenhouse gas emissions county- and region-wide 2% annually.
- Fully implement public energy dashboards that show the energy use of each public building, and to encourage private businesses to publicly post their buildings' energy use.
- Install solar panels on county schools and government buildings, and promote installation of alternative energy in homes and businesses.
- Form a public-private sustainability coalition to bring together government, faith communities, labor, business, health care and educational organizations to drive a low carbon/no carbon future for the county.

Sincerely,

**Would you like to join in supporting the Fairfax to Zero initiative?**

- I would like to collect petition signatures for the Fairfax to Zero campaign
- I would be willing to visit my supervisor's office for an in-person meeting about the Fairfax to Zero campaign
- I would be willing to write a letter to the editor about Fairfax to Zero
