

THE

CONNECTICUT PLAN

The relentlessly rising cost of health care is harming workers, families and our entire state economy. The hardest-working people and the small businesses and nonprofits that are the economic engines of our economy deserve better.

The Connecticut Plan – a bill now before the state legislature – would fix this.

Small businesses & nonprofits are sick of

- Not being able to find or keep skilled workers
- Not being able to compete with corporate benefit packages
- Double-digit increases in costs for overly complex and confusing health care coverage
- Unpredictable and unstable health care costs
- Paying for nothing – for high-deductible plans where employees never even see \$1 of benefit

The Connecticut Plan (SB 346) will offer

- High-quality health care with affordable premiums & no high deductibles
- Multiple plan options to align with your budget and benefit needs
- No long term commitments
- Dental insurance included
- Stabilized costs by leveraging the market power of the state employee plan
