

San Francisco Opera Back-up Light Board Operator

- Back-up Lightboard Operator will report to the Master Electrician.
- Will need to be a highly skilled ETC. EOS, GIO and ION Light Board Operator. Capable of programming complex lighting cues with multiple moving light fixtures, LED fixtures, doublers, color scrollers and conventional dimming fixtures.
- Will work closely with the Opera's Systems Administrator and Key Light Board Operator to maintain standards that are consistent with the efficient programming, maintenance and storage of show files.
- Communicate well with all in-house and guest Lighting Designers in a clear, diplomatic and concise way. Relate information to other members of the electricians and lighting staff as needed.
- The Back-up Light Board Operator will confer with the Lighting Director and design staff on all programming needed for productions and related rehearsals.
- Experience working in repertory and remounting shows.
- Keep up to date on new industry standards and equipment.
- Working knowledge of the following:
 - PC and Mac operating systems
 - Google docs and sheets
 - Microsoft Office
 - Networking
 - Access
 - Vectorworks
 - Projection
 - Mbox
- This is an as-needed position during the San Francisco Opera season

Resumes should be received by Monday, July 12th 2021.
