

The 27th Conference of the Parties to the UN Framework Convention on Climate Change

7 - 18 November, 2022

In the Red Sea resort town of Sharm el-Sheikh, Egypt, the world's nations will soon come together again and face-off with various pledges and commitments to halt climate destruction. MAPA will plead for justice and help.

The global north will make promises, promises, and more promises.

**We must move from leaders' climate pledges to
implementation now - There is no time to lose!**

Even if you do not attend the COP27 meetings, **YOU CAN ACT** - demand action from leaders, no more of their blah-blah-blah! Wield your energies and civil disobedience in positive ways so world leaders will *implement* their climate promises.

How?

- **Write** letters, emails, social media posts, make phone calls, etc. to public leaders, elected officials, fossil fuel extractors, and other parties. Call them out on unfulfilled climate promises. Demand that they abide by the Paris Agreement - [write effectively](#).
- **Support MAPA** - the Most Affected People and Areas - by specifically naming peoples, nations, and countries who seek climate justice.
- **Get training from Fridays for Future** - [sign up here](#).

- **Organise** peaceful (high profile if possible) Fridays for Future demonstrations outside of COP27, or anywhere on the globe - make signs and banners, gather friends and neighbours in your town. Gather signatures to build your base - sign up for FFF training [here](#).
- Call your local radio and television stations to cover your demonstration, no matter how small: One person can be a demonstration.
- Register your strike [here](#), so that your strike will get a pin on the FFF Map.
- **Post your photos on your preferred media!**
- **Join together with other climate action groups** to amplify the message. The more the merrier!
- *Remember:* Fridays for Future advocates peaceful demonstrations. We do **not** condone violence against others, or against public or personal property!

“For us, what we want this COP to be about is moving from pledges to implementation. And we want to highlight what are the practical policies and practices, the processes that can actually push the pledges, to bridge that gap.”

–Rania Al Mashat, Egypt’s Minister for International Cooperation, on COP27
