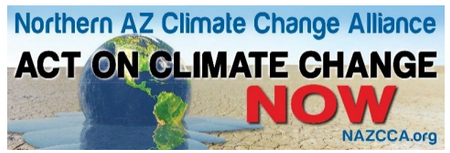
Stop the Rate Hike - Arizona Public Service (APS) wants to take another 14% from you!

To the Arizona Corporation Commission (ACC):

We ratepayers urge the ACC to reject APS's proposed 14% rate hike. In March (2026) Attorney General Kris Mayes filed expert testimony with the ACC showing rate increase is unjustified and could be reduced to 4% while still maintaining reliable service and a strong credit rating.



This is important because:

We are deeply concerned about climate change.

We urge APS to reduce rates by installing more Wind and Solar Power
- less expensive to build.
- least expensive way to generate electricity.

Fossil fuel plants are more expensive and they destroy our climate.
